

Bedroom planning Guide

There's a lot to consider when planning a new bedroom, as we spend at huge amount of time in there, so it's extremely important that you get it right so that you can enjoy a restful night's sleep.

All of our bedroom furniture is handmade for you and your home and we have all manner of storage solutions to help meet your demands. Meaning we can create bespoke storage for shoes, hats, ties, belts, jewellery or even your Television.

Take time to think about what you need from your bedroom. The amount of storage. The type of storage – hanging for shirts, suits, long coats/dresses etc. Then look at your room - is it a light room, how many windows does it have. Think about colour and the styles you like, It's even a good idea to collect pictures from magazines, fabric samples, paint colours etc – keep them together in a folder and bring them with you when you visit the showroom.

We have put together a number of questions relating to the different types of storage required in a bedroom. You may not need to answer all of them, but they act as a prompt to help cover all potential aspects that your project may require.

If you prefer, we would be happy to take you through the guide or feel free to telephone us on 0161 620 4123 with any questions you may have.
